

Steps

3. The movement window will open. Make sure the Movement Type is set to **Arrival, Removal or Departure** as required.

Enter the From location and To location as required.

Enter the start date / time and draft information for the movement.

Check the Exempt movement checkbox if applicable. Otherwise click on the Resource Requests tab and specify resources as required.

Click the **Anchorage To** tab and select the **Anch Reason** from the drop down list, if the movement is to or from an anchorage.

Click **Save**.

4. The visit will now be displayed with the added movement and for the existing movements the **Type Move** (ARR, REM & DEP) will be updated automatically if applicable.

Add more movements as required using the above steps.
