# Motor Vehicle Facilities

# Motor Vehicle Facilities

The Port of Fremantle handles the importation of over two-thirds of Western Australia's new motor vehicles, with up to 100,000 vehicles imported annually.

Recognising the importance of this trade and in view of the sustained growth in the car import business, since the mid-1990s, Fremantle Ports has introduced initiatives to add value to this trade.

Victoria Quay is the preferred berthing area for pure car carriers from Asia which handle two-thirds of the port's motor vehicle imports. This provides those in the industry with consistency for planning.

The storage area for motor vehicles on Victoria Quay is monitored by cameras and accessible only through a monitored security gate.

Fremantle Ports, working with vehicle transport and distribution companies, also provides dedicated facilities for on-wharf vehicle processing.

These dedicated areas at F and G Berths on Victoria Quay enable PrixCar Services and Patrick Autocare to fast-track dealer-allocated vehicles.

The on-wharf facilities have the capacity to store around 800 vehicles and have added value by providing customers with the ability to process pre-allocated urgent retail vehicles for delivery direct to dealers.

The on-wharf vehicle processing facilities reduce costs relating to car handling in Fremantle by minimising lead time and eliminating any unnecessary transport.

The dedicated facilities enable on-vessel survey and plastic stripping and washing within the wharf area. Both PrixCar and Patrick Autocare have 4,400 square metre warehouses.

Victoria Quay currently provides sufficient stacking area to handle single shipments of up to 4,800 vehicles.

The dedicated facilities for vehicle handling represent another example of how Fremantle Ports is working with customers to enhance their business.

The on-wharf processing arrangements enable more efficient use of wharf areas whilst providing the flexibility of longer term vehicle storage.

Enquiries about the on-wharf facilities should be directed to Fremantle Ports' Trade and Business Branch on (08) 9430 3377, or Fremantle Ports' Common User Coordinator on (08) 9430 3363.
