

Electricity tariffs and charges from 1 July 2025

Fremantle Ports provides a range of electricity tariffs and charges to support the supply of power to port users. These rates cover electricity usage for shore power, facilities, and infrastructure connections provided to customers, businesses, and organisations operating within the port.

Each tariff has eligibility requirements that are outlined below the table and should be reviewed to ensure the correct selection is made for your organisation. You may change your tariff to one for which you are eligible by providing at least 30 days' written notice before the 10th of each month. The selected tariff must then be retained for a minimum period of 12 months.
